- 2 Benadryl vials
- 1 400 mcg Dopamine vial
- 20 800mg IBU
- 1 Nitro-Bid Pump spray
- 1 LED signal light (blue)

I was able through creative use of webbing to attach a E cylinder of Oxygen to exterior, but this is a dangerous setup. Could put a smaller tank in interior pocket(s) if you really try.

There is still room for a IFAP pack on top of Large Exterior Pocket. But, This will be very bulky.

I bought this pack thinking it was bigger.

Total weight: 20.6lbs
