

NEED A DALLAS AREA PHOTOMETRIC SURVEY QUOTE?

Please provide the following information:

- 1) Photometric plan from the PE (Professional Engineer) showing the property layout, locations of fixtures and predicted light levels in candlepower
- 2) Physical address of the target site and / or the nearest intersection and corner of that intersection as many new builds do not show up in Google Maps
- 3) Nature of the business (restaurant, warehouse, etc.)
- 4) Verify that all exterior lighting including individual bulbs / fixtures / circuit breakers are working to avoid charges for extra trip fees. Please note any change orders where fixtures are moved, added or deleted to avoid confusion
- 5) Your name, title or position, company name, email address and the best phone number(s) and when to reach you
- 6) How soon you need the survey (notice that photometric surveys are subject to weather conditions and visibility with a minimum of 6 nautical miles so cannot be done on rainy days)
- 7) Any special access to the site such as gates, locks, key lock boxes, access codes and / or a contact person to meet onsite
- 8) Form of payment preferred (for any Certificate of Occupancy work, we request payment upon receipt of the report - generally a credit card number charged at the time the report is sent)

ScanTech Technical Consulting

(214).912.4691

And please speak slowly, leave a clear message and an EXTENSION number if applicable. Sometimes there is no answer due to the number of telemarketers or I am either driving, onsite, or on the phone with another client. I understand a lot of people are uncomfortable with voicemail, so feel free to text or email below:
